# NewDrive

NewDrive is an alternative to GoogleDrive for storing files. It will have the functionality to select a folder and automatically create the same on our cloud drive with all ethe files and folders inside.

In "DB diagram.png" file you may see our database diagram.

In "Uml-Diagram.PNG" file you may see an architecture of our application.

In "Use cases.png" file you may see some use cases which we are going to cover in our application.
